- The Mythology of Modern Dating Methods. ~ [*John Woodmoreappe*,] Institute for Creation Research: El Cajon, California USA
- Many Infallible Proofs. ~ [*H.M. Morris, Master Books Inc.*]

Note *It is possible the dinosaurs and other extinct life forms, that are claimed to be millions of years old, could not adjust to the new climate that followed the great flood of Noah. Also, survivors would have been hunted to extinction, which is still happening. [Flood date approximately 2348 B.C. Source, The Wall Chart of World History]. National Library of Australia. Card Number and ISBN 1 86256 3076 3.*

DATING

- **FACT: 1.** Carbon 14 dating - Potassium-Argon Dating etc, **cannot** give a time in the distant past accurately. *Scientific Creationism ~ Henry Morris Ph.D., Chapter 6. Pages 137/150.*
- **FACT: 2.** Lava dome samples taken from Mt St Helens in North America after the volcanic eruptions of the 1980's were dated by Geochron Laboratories of Cambridge M. A., (a high quality radioisotope dating laboratory) giving them an age range from 340,000 to 2.8 million years for the same lava samples. *Ref, Creation magazine June/August 2001. Page 23.*
- **FACT: 3.** There are many eminent scientists who don't believe in using radiometric dating as a reliable method for calibrating the age of the fossils, rocks, and other strata.
- **FACT: 4.** The system of using carbon dating etc., relies on going into a *theoretical* period in the *past*, **before applying this method.** (e.g., going back to the so-called Jurassic Age, then taking samples, while presuming this period of time is already millions of years old.)
- **FACT: 5.** Radiometric dating cannot be applied from our present time to periods in the *past* to prove vast ages. (e.g., millions of years.)
- **FACT: 6.** Carbon 14, Potassium-Argon etc., depletes in different materials at different rates of decay and therefore cannot be a reliable yardstick for dating rocks, fossils etc.

- **FACT: 1.** Carbon 14 dating - Potassium-Argon Dating etc, **cannot** give a time in the distant past accurately. *Scientific Creationism ~ Henry Morris Ph.D., Chapter 6. Pages 137/150.*

- **FACT: 6.** Carbon 14, Potassium-Argon etc., depletes in different materials at different rates of decay and therefore cannot be a reliable yardstick for dating

- **FACT: 7.** Radiometric dating and evolution is presented on TV, in newspapers, magazines, and promoted in our education system as the truth, when in fact there is **no irrefutable evidence** that the earth is any more than around 6,000 to 10,000 years old, 6,000 being the most likely age.
- **FACT: 8.** You are being **lied** to by some of **the media, educators etc.**, when they are **promoting long ages as truth.** (*Sometimes passed on in parrot fashion*).
- **FACT: 9.** People who promote evolution cannot give you an acceptable starting point for the universe as **evolution is only theory and assumptions.** It has not been proven scientifically, and as with belief in God and creation, **it has to be an act of faith to believe it.**
- **FACT:10.** The Evolution and radiometric theories have also created a somewhat **false industry** for many academics, including archaeologists and palaeontologists.

SUMMARY : Evolutionists should give us scientific answers (**proof**) as to where the atoms etc., came from that were the foundation for the universe before they put forth the theory of evolution as truth. The Bible says in *Genesis 1:1* all things were made by God. This would include the atoms that make up the universe, (Matter). The bottom line here is where do you want to put your **faith**, - - in man who is only relying on theories or Almighty GOD. ?
